

# 125 GALLON BREW SYSTEM

## BREW VESSEL FEATURES:

- 160 Gallon operating capacity
- 125 Gallon yielding system
- Constructed of 304 food grade stainless steel
- Open top design with 4" dished bottom drain
- Easy to clean design
- Clean in Place (CIP) spray ball removable from tank
- Four (4) stainless steel legs on casters
- 1.5" sanitary manual ball valve for water inlet

## SYSTEM FEATURES:

- Variable speed motor for shaft driven agitation
- Variable speed motor for liquid transfer pump
- Interior 304 stainless steel filter
- Exterior 304 stainless steel filter housing
- Hand held mixing oar

## BREW SYSTEM OPTIONS:

- Water/Glycol chiller
- Matching holding/blending and brite tanks
- IFM Effector flowmeter
- Energy efficient jacketed brew vessel
- Advanced external polishing filtration system
- Advanced Allen Bradley touch screen controls
- High yield liquid transfer pump

## BREWING SPECIFICS:

- Maximum Capacity **160 Gallons**
- Minimum Batch Size **50 Gallons**
- Processing Time **6 - 8 hours**
- Recommended Ratio **1/2 pound coffee to 1 gallon of water**
- Electrical Draw **208VAC, 3PH, 16A, 60Hz**
- Piping Size **1.5"**
- Maximum Inflow **34 GPM**
- Micron Rating **100 - 1 Micron**

**Financing and Leasing  
Options Available!**
